## 2. Installation and Configuration

In this section we will show you how to properly install and configure your SpamExperts Reseller For WHMCS

1. Download SpamExperts Reseller For WHMCS.
2. Upload files to your server and extract SpamExperts Reseller For WHMCS to your WHMCS root directory.
3. Go to the Setup → Products/Services → Products/Services and press on the Create a New Product.
4. Afterwards, choose product group, fill Product Name field and press Continue.
5. Switch to Module Settings tab and choose Spamexpertsreseller from Module Name dropdown.
6. Enter your API URL into Spam Panel URL and API access details into API Username and API Password fields.
7. Set up restrictions for product if you wish. You can restrict amount of domains bound to one product through typing its limit quantity into Domain Limits field. You can also restrict reseller API access for an account through checking Usage Limits checkbox.
8. Confirm settings by clicking on Save Changes button.

### Management

1. Domains Management 2. Bandwidth Usage 3. Log In To Panel

Fig. 3: Client area with marked buttons.

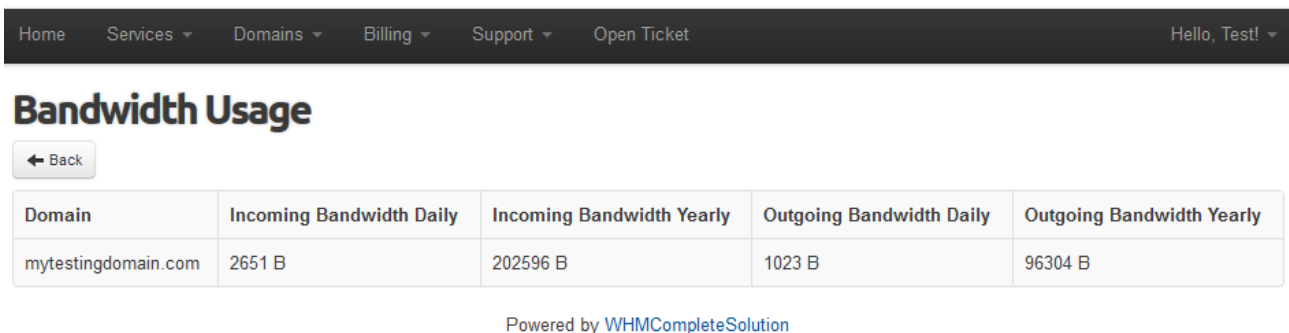

You can bind/unbind domains at Domains Management page. To move to that page press a Domains Management button (1). Here you can view list of bounded domains and bind new one. To bind new one, enter it into field marked on the following screen and press Add button.

The screenshot shows the WHMCS interface. At the top is a navigation bar with links: Home, Services, Domains, Billing, Support, Open Ticket, and a user greeting 'Hello, Test!'. Below the navigation bar is the 'Domains Management' section. It features a 'Back' button and a table with one row containing the domain 'mytestingdomain.com' and an 'Unbind' button. Below the table is a 'Bind Domain' section with a text input field containing 'anotherdomain.com', a green 'Bind' button, and a red arrow pointing to the button. At the bottom of this section is the text 'Powered by WHMCompleteSolution'.

Fig. 4: Domains Management tab with shown domain binding.

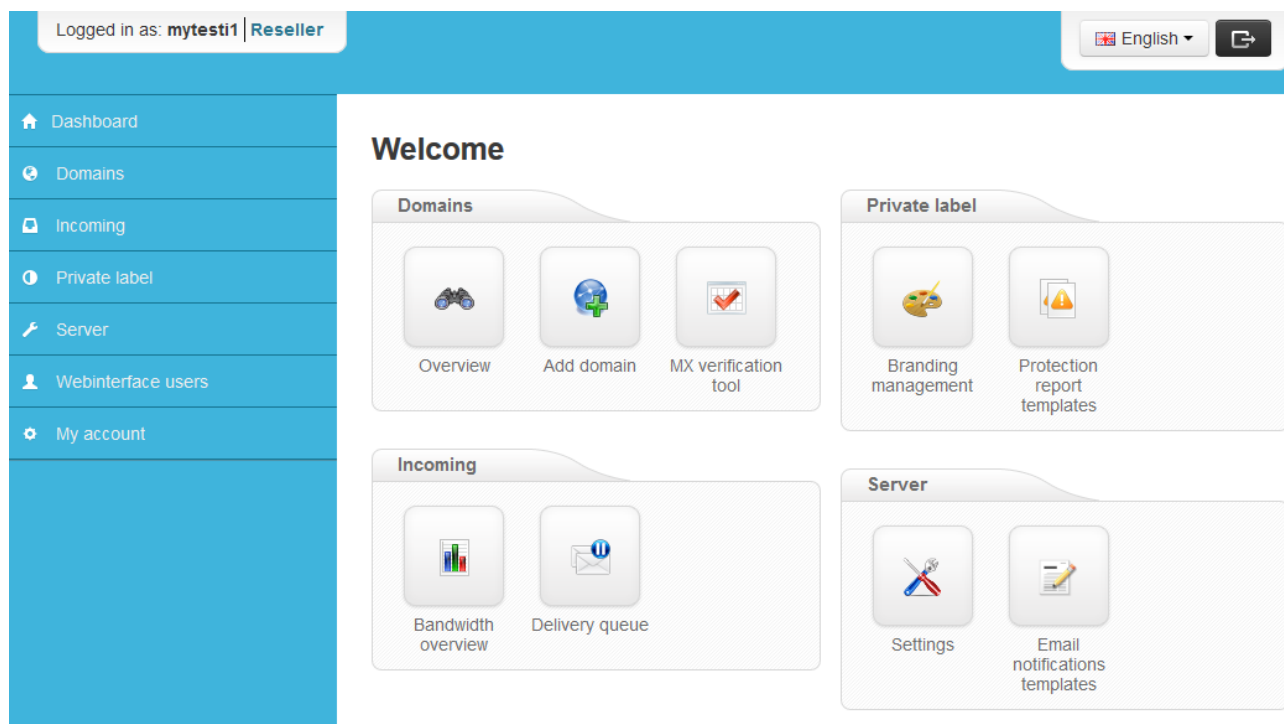

To view bandwidth of specific domains, press a Bandwidth Usage button (2).

The screenshot shows the WHMCS interface. At the top is a navigation bar with links: Home, Services, Domains, Billing, Support, Open Ticket, and a user greeting 'Hello, Test!'. Below the navigation bar is the 'Bandwidth Usage' section. It features a 'Back' button and a table with bandwidth usage data. The table has five columns: Domain, Incoming Bandwidth Daily, Incoming Bandwidth Yearly, Outgoing Bandwidth Daily, and Outgoing Bandwidth Yearly. The first row of data shows 'mytestingdomain.com' with 2651 B incoming daily, 202596 B incoming yearly, 1023 B outgoing daily, and 96304 B outgoing yearly. At the bottom of this section is the text 'Powered by WHMCompleteSolution'.

Fig. 5: Bandwidth Usage page with exemplary usage.

Through pressing Log In To Panel button (3) you will be logged into your Spam Experts account.
